

Welcome to DR Discovery Day.

This is your opportunity to tour the campus, meet the staff and check us out. It is not required for enrollment, but highly recommended if you have not been to our campus before. We are unique. We are different.

The tour is informal, will take about an hour and give you a great deal of information. You will tour the campus and meet with an advisor, a licensed staff member.

You will meet with a DR advisor that has been where you are. All are licensed in multiple cosmetology fields and fully aware of your excitement and questions. I encourage you to ask about them about their background in the cosmetology field.

They love to share.

What they are not. They are not commissioned sales representatives of the school. They do not read from a script. DR is a private school that provides an exceptional education, small classes, and great outcomes. FYI/Our licensing rate with the State of Indiana is 100/first time testers that pass the exam and has been for many decades.

Check out our website www.donrobertsschoolofhairdesign.edu for details. Hit the student resources/orientation tabs for our school catalog, course outlines, disclosures, and student handbook.

The advisor's goal is to help you determine if DR and you are a good fit!

To begin, our goal is to help you get the information you need so that you can make an informed decision about a new career!

The advisors are educators that want to know how you learn best.

They are nosy.

This is your key to a successful education. They will have conversation that identifies your learning style, answer your questions, and will provide insight needed to help you meet your career goal.

The advisor will start your DR Discovery Day with the gathering of some information about you.

Simple stuff that helps us help you.

The conversation will hone in on program details; days and hours of class; applicable to your career goals, applicable class start dates, educational charges, pre-scheduled school holidays, enrollment requirements, academic standards, time table for program completion, graduation and licensure, employment opportunities and financial and scholarship qualifying factors. They will share helpful information about how to qualify for early state exams and the probability of immediate employment. At the end of the interactive conversation, if your interest is strong, you will be given a homework assignment!

Again, simple stuff that helps us help you.

A second appointment is often recommended, a week later, so that the financial aid office can present a financial aid package to you. This will help you understand how the education is attainable.

Our team is here to share our amazing history as a post-secondary school, help you compare and school shop and encourage you to choose a school that is not only right for you, but is accountable for its outcome, the successful graduate.

Enjoy the journey, one day at a time.

Jan Stemmer, President
